

Schlage

Category: Security

Ingersoll Rand is a world leader in creating and sustaining safe, comfortable and efficient environments in commercial, residential and industrial markets.

Schlage, a business of Ingersoll Rand, is the leader in security devices, trusted for over 90 years, spanning both the commercial and residential markets.

At Schlage, creating more secure and safe environments for your residents and your staff is our vision, mission, and passion.

By creating more secure, efficient and comfortable environments, we also help you differentiate your properties to better attract and retain residents.

The residents of your multi-family community demand a good location, convenience, great design and superior security for themselves and their family. Schlage can help you deliver effective, streamlined and reliable safety and security at every access point in your community.

Schlage's security consultants work with you to create more secure and safe environments for your residents and your staff. We also help you differentiate your properties to better attract and retain residents, drive down your operating expenses, and reduce your liability exposure. With more than 100 years of experience, we offer knowledgeable service, superior products and comprehensive planning that fits your needs:

- Thorough planning for security, access control and crisis management
- Security for the environment with high performing products from Schlage, Von Duprin and LCN
- Influencing traffic patterns through access management
- Specification of proper hardware for each opening, and its use and traffic flow
- Key control that is easy to manage and protects the property's security

We know that multi-family buildings come with a unique set of safety and security challenges. That's why our products, such as Schlage's FE210F electronic interconnect (*pictured here*), provide panic-free, single motion egress that complies with National Fire Protection Association (NFPA) and local building codes.

Designed for both new construction and retrofit projects, the electronic interconnect offers the latest in design choice and ease of installation. To meet the demands of residents, the mechanical interconnect is available with several new features such as:

- A variety of lever designs to provide never before available suiting options
- A variety of finishes to suite with other interior hardware
- Select code compliant levers with return to door requirements and all levers meet ADA requirements
- The interconnect mechanism is adjustable to fit standard door preparations
