

Time Warner Cable

Category: Telecommunications

TWC Community Solutions, Time Warner Cable's business unit dedicated to Multifamily, is more than just another service provider. We partner with our customers to provide the high quality video, voice and data services they have come to expect. In addition, we create unique and compelling solutions that benefit our partners' bottom lines because of our flexibility, creative billing programs and competitive pricing.

We believe in providing our customers and your residents with the ability to connect with information, entertainment and each other by giving them control in ways that are simple and easy.

Our advanced fiber network delivers the latest innovations for our customer's homes—from high-definition television, to Enhanced TV features, to high-speed data and Digital Phone services.

Time Warner Cable Mobile Internet:

We recently launched Time Warner Cable Mobile Internet to provide our customers with the freedom to connect to reliable, high-speed Internet on their laptop, when they are away from home. Our customers can enjoy the flexibility of downloading files, checking email, sharing photos or even watching television, online, on the go—all without having to search for Wi-Fi hotspots. Time Warner Cable Mobile Internet gets its speed and connectivity from 4G and 3G technology. 4G coverage is available in select markets and provides super-fast mobile Internet service throughout metro areas. 3G coverage is available nationwide at slightly slower speeds, in most of the same places that receive wireless phone service.

Digital TV:

Residents are able to turn their TV into an enhanced, interactive high-definition experience where they can enjoy the very latest in home entertainment—on their schedules. TWCable TV™ for iPad™ turns any room in the house into a TV room. Look Back® allows our customers to go back to select the Primetime show they missed up to 72 hours later.

Digital Home Phone:

With Digital Home Phone from Time Warner Cable, residents get outstanding clarity, unlimited calling, innovative, easy-to-use calling features, plus reliable service all for one low price. Additionally, they can keep their current phone number and existing phone.

More:

With innovation as a guiding principle, you can always count on more coming from Time Warner Cable.

Internet:

When your residents are looking to Super-charge their Internet connection, they can look to Time Warner Cable. With us, your residents can do more of what they love. From Time Warner Cable Wideband to Road Runner® Broadband, your residents will experience speeds four times faster than standard DSL packages. Also with My Services, Internet Security Suite, Internet Parental Controls and RoadRunner.com, the experience is completed. With My Services residents can manage their Internet, control their DVR remotely, check voice mail online and more.

We'll give your residents what they want—even before they know they want it.

Technology is magical. The excitement it creates turns us all into kids again. If it also makes life easier, we put it to work. A good example is Time Warner Cable Mobile Internet. Customers didn't know they wanted the speed and freedom of Internet on the go. Now, they can't live without it. You expect nothing less. Time Warner Cable delivers.
